**CINS: OLEA EUROPAEA** 

ZEYTİN AĞACI – OLEA TREE

Zeytin anavatanı Akdeniz bölgesi olan ve ülkemizde de doğal olarak yetiştiği gibi binlerce yıldır kültürü yapılan bir ağaçtır. Meyvelerinden elde edilen yağı ise aynı zamanda tıbbi olarak kullanılan en önemli ürünüdür.

İnsanoğlunun varlığı ile birlikte anılmaya başlayan zeytin, eski çağlardan bu yana yaşamın her devresinde barışın ve sağlıklı yaşamın sembolü olmuştur. Meyvesi ve yağı gıda olarak kullanılan bu antik bitkinin tüm kısımları günlük hayatın her alanında yer almıştır. Atık olarak düşünülen zeytin çekirdeği ve zeytin yaprağı ise halk hekimliğinde uzun yıllardır kullanılmıştır. Bitki yaş aldıkça ve olgun boyuna ulaştıkça su isteği azalır.

**FAMILY: OLEACEAE** 

**GENUS: OLEA EUROPAEA** 

OLIVE TREE – OLEA TREE

Olive is a tree that is native to the Mediterranean region and has been cultivated for thousands of years as well as growing naturally in our country. The oil obtained from its fruits is also the most important product used medicinally.

Olive, which started to be mentioned with the existence of human beings, has been the symbol of peace and healthy life in every period of life since ancient times. All parts of this ancient plant, whose fruit and oil are used as food, are included in every aspect of daily life. Olive seeds and olive leaves, which are considered waste, have been used in folk medicine for many years. As the plant ages and reaches its mature size, its water requirement decreases.

**FAMILIE: OLEACEAE** 

**Gattung: OLEA EUROPAEA** 

OLIVENBAUM - OLEA-BAUM

Der Olivenbaum ist im Mittelmeerraum beheimatet und wird seit Tausenden von Jahren kultiviert und wächst auch in unserem Land natürlich. Das aus seinen Früchten gewonnene Öl ist auch das wichtigste medizinische Produkt.

Olive, deren Erwähnung seit der Existenz des Menschen begann, ist seit der Antike in jedem Lebensabschnitt ein Symbol für Frieden und gesundes Leben. Alle Teile dieser uralten Pflanze, deren Früchte und Öl als Nahrungsmittel verwendet werden, sind in jedem Aspekt des täglichen Lebens enthalten. Olivenkerne und Olivenblätter, die als Abfall gelten, werden seit vielen Jahren in der Volksmedizin verwendet. Wenn die Pflanze älter wird und ihre reife Größe erreicht, sinkt ihr Wasserbedarf.

СЕМЕЙСТВО: OLEACEAE.

РОД: OLEA EUROPAEA.

## ОЛИВКОВОЕ ДЕРЕВО – ДЕРЕВО ОЛЕЯ

Олива — это дерево, произрастающее в Средиземноморском регионе и выращиваемое на протяжении тысячелетий, а также естественным образом растущее в нашей стране. Масло, полученное из его плодов, также является важнейшим продуктом, используемым в медицинских целях.

Олива, упоминание о которой началось с появлением человека, с древних времен была символом мира и здоровья в любой период жизни. Все части этого древнего растения, плоды и масло которого используются в пищу, используются во всех аспектах повседневной жизни. Семена и листья оливы, которые считаются отходами, уже много лет используются в народной медицине. По мере того как растение стареет и достигает зрелого размера, его потребность в воде снижается.
